JAIDEN LEWIS

Routledge Handbook of the Digital Environmental Humanities Edward Elgar Publishing
Undoubtedly the applications of polymers are rapidly evolving. Technology is continually changing and quickly advancing as polymers are needed to solve a variety of day-to-day challenges leading to improvements in quality of life. The Encyclopedia of Polymer Applications presents state-of-the-art research and development on the applications of polymers. This groundbreaking work provides important overviews to help stimulate further advancements in all areas of polymers. This comprehensive multi-volume reference includes articles contributed from a diverse and global team of renowned researchers. It offers a broad-based perspective on a multitude of topics in a variety of applications, as well as detailed research information, figures, tables, illustrations, and references. The encyclopedia provides introductions, classifications, properties, selection, types, technologies, shelf-life, recycling, testing and applications for each of the entries where applicable. It features critical content for both novices and experts including, engineers, scientists (polymer scientists, materials scientists, biomedical engineers, macromolecular chemists), researchers, and students, as well as interested readers in academia, industry, and research institutions.

Contested Knowledges IGI Global

Provides an interdisciplinary overview and critical examination of how individuals are affected by mass media. There are few areas of modern social science that are as fiercely debated as media psychology. Written by one of the foremost experts on the topic, this is a concise overview of what is known and not known about how individuals are affected by and interact with various forms of mass media. The book critically examines research from cognitive, social, developmental, biological, and evolutionary approaches to psychology and addresses the interplay between media consumption and viewer behavior in such realms as advertising, body image, sex, and violence. Distinguished by its examination of research from a scientifically objective position, the book offers students not only current knowledge of media psychology but also the tools to challenge commonly held assumptions from popular advocacy and ideology. This text cuts across different psychological approaches to studying how individuals are affected by mass media and includes research from criminal justice and sociology. It considers critical debates in media psychology and how debates in science themselves can be influenced by processes such as moral panic. Written in a lively, accessible manner, the book draws upon engaging examples such as Photoshopped model controversies, dubious advertising practices, and attempts to blame violent crimes on media to illustrate scholarly principles. Throughout, data from research studies is related back to real-world phenomena such as violence rates, advertising dollars spent, or changes in the news media. Written for upper level undergraduate and graduate students studying media psychology, the text will also be of value to professionals in psychology, sociology and criminal justice as well as individuals involved in public policy as it relates to media effects. Key Features: Offers an objective, interdisciplinary approach to understanding media and behavior. Draws from cognitive, social, developmental, and biological psychology, as well as criminal justice research and sociology. Challenges the conclusions drawn from research to foster critical thinking. Written in a lively, accessible writing style with engaging examples grounded in research. About the Author Christopher J. Ferguson, Ph.D. is a clinical psychologist and department chair of psychology at Stetson University in DeLand, FL. He has done extensive research on the effects of media in realms ranging from video game and television violence effects, to body image to advertising effects. He has also examined how methodological issues, researcher expectancies and questionable researcher practices, and societal pressures and incentives can create false positives in media psychology. Clinically, he has done extensive work with criminal justice populations including juvenile offenders, adult inmates and child protective services. Aside from his academic work, Chris is the author of a mystery novel, *Suicide Kings*, which follows a young woman in Renaissance Florence investigating her mother's death. He has also published a number of short stories, mainly in speculative fiction. He lives near Orlando with his wife and young son.

The Politics of the Asia-Pacific Univ. Press of Mississippi

Part of the Elgar Series on Central Banking and Monetary Policy, this book explores the relationship between central banking, monetary policy and the economy at large. It focuses on the specific relationship between central banking, monetary policy and the environment as central banks wake up to new realities.

Public Relations and Whistleblowing Elsevier Health Sciences

This book introduces readers to the deep political tensions in the Asia-Pacific and offers classroom simulations designed to encourage students to delve deeper into the issues and dynamics of the region.

Breast Cancer and Gynecological Cancer Rehabilitation CRC Press

Why were Scandinavian women such active proponents to Christian conversion? A question which has found itself recurrent in conversion literature. This book is a preliminary investigation which explores women in Norse and Christian mythology highlighting their similarities and discussing the roles of Christian women and Norse pre-Christian women again highlighting similarities between the two in order to show that some outlying factor was responsible for women's decision to convert to Christianity.

Enhancing Student Education Transitions and Employability Lippincott Williams & Wilkins

From shambling zombies to Gothic ghosts, horror has entertained thrill-seeking readers for centuries. A versatile literary genre, it offers commentary on societal issues, fresh insight into the everyday and moral tales disguised in haunting tropes and grotesque acts, with many stories worthy of critical appraisal. This collection of new essays takes in a range of topics, focusing on historic works such as Ann Radcliffe's *Gaston de Blondeville* (1826) and modern novels including Max Brooks' *World War Z*. Other contributions examine weird fiction, Stephen King, Richard Laymon, Indigenous Australian monster mythology and horror in picture books for young children.

Exploring Police Integrity Routledge

The COVID-19 pandemic caused global shock to the entire economic system. As a result of the government restrictions, both production and distribution channels were interrupted. In this situation, however, it was possible to observe that some companies were able to adapt to these new conditions. The demand for the possibility of translating physical business into virtual increased. The

COVID-19 restrictions showed that many entrepreneurs do not have enough knowledge about the available online tools and possibilities. Given that the digital transformation of business today often consists only of incorporating existing tools into existing processes, transition to e-commerce could be made easily and quickly. *Moving Businesses Online and Embracing E-Commerce: Impact and Opportunities Caused by COVID-19* analyzes the impact of COVID-19-related restrictions on business models of enterprises affected most by these restrictions and examines transformational changes induced by the accelerated adoption of internet technologies and transition to e-commerce-based business models. Covering topics such as customer relationship management (CRM), small and medium enterprises (SMEs), and customer loyalty, this book serves as an essential resource for business owners, CEOs, managers, IT consultants, web developers, students, professors, entrepreneurs, researchers, industry professionals, and academicians.

Knowledge Management in Organizations Cambridge Scholars Publishing

Create individualized nursing care plans with ease and confidence! *Ackley and Ladwig's Nursing Diagnosis Handbook, 13th Edition* uses an easy, three-step system to guide you through client assessment, nursing diagnosis, and care planning. Step-by-step instructions show how to implement care and evaluate outcomes, and help you build skills in diagnostic reasoning and critical thinking. To make care planning easier, this handbook allows you to look up nursing diagnoses and care plans for more than 1450 client symptoms, as well as interventions from NIC (Nursing Interventions Classification) and outcomes from NOC (Nursing Outcomes Classification). Edited by noted nursing educators Mary Beth Flynn Makic and Marina Reyna Martinez-Kratz, this reference provides everything you need to write nursing care plans in just one book! Easy-to-follow Sections I and II guide you through the nursing process and selection of appropriate nursing diagnoses. Step-by-step instructions show how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. UNIQUE! Care plans are provided for each NANDA-International© (NANDA-I©) -approved nursing diagnosis. Evolve website includes a care plan template, case studies, review questions, and more! Evidence-based interventions and rationales include research studies and references supporting the use of each intervention. Examples of and suggested NIC interventions and NOC outcomes are presented in each care plan. Quality and safety content emphasizes what must be considered to provide safe patient care, and includes QSEN content in Section I. Pediatric, geriatric, multicultural, and home care interventions are included as appropriate for plans of care. Index of NANDA-I© Diagnoses on the inside back cover of the book provides quick reference to page numbers. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. NEW! Updated content is based on the 2021-2023 NANDA-I© -approved nursing diagnoses and reflects new diagnoses, revised diagnoses, and retired diagnoses. NEW! Updated nursing diagnoses include class and domain information as consistent with the current NANDA-I.

Finite Element and Boundary Methods in Structural Acoustics and Vibration Springer Nature

This work provides an innovative new look at police ethics, including results from an updated version of the classic Police Integrity Questionnaire, including new social and technological advances. It aims to push the study of police research further, expanding on and testing police integrity theory and methodology, the relationship between community and integrity, and the influence of multiculturalism and globalization on policing and community attitudes. This work brings together experienced scholars who have used the police integrity theory and the accompanying methodology to measure police integrity in eleven countries, and provide advance and sophisticated explorations of the topic. Organized into three thematic sections, it explores the testing methodology for international comparisons, insights into police-community relations, and explores police subcultures. This innovative book will be of interest to researchers in criminology & criminal justice, particularly with an interest in policing, as well as related fields such as sociology, public policy, and comparative law.

Moving Businesses Online and Embracing E-Commerce: Impact and Opportunities Caused by COVID-19 Springer

Effectively Construct Integral Formulations Suitable for Numerical Implementation *Finite Element and Boundary Methods in Structural Acoustics and Vibration* provides a unique and in-depth presentation of the finite element method (FEM) and the boundary element method (BEM) in structural acoustics and vibrations. It illustrates the principles using a

Organizational Culture in Business: How to Create and Adapt to Change W. W. Norton & Company

Navigating the Aspirational City forwards a theory of contemporary Chinese urban educational culture that focusses on historical conceptions of "the good citizen" and the contemporary material environments within which parents pursue their childrearing projects.

Intergenerational Solidarity in Children's Literature and Film Routledge

This book explores student education transition and employability negotiation experiences in various contexts. It explores determinants of student transitions at three levels including macro, meso and micro but focuses on exploring affordances, constraints and strategies at the micro level. The framework underpinning the explorations at the micro level covers a range of different forms of capital including human, culture, social, identity, psychological and agentic. The book is unique in three ways. First, it consists of chapters about critical discussion, empirical research and practical guidance about student transition experiences. The critical discussion and empirical research chapters explore and obtain insights about the complexity of student transitions and develop conceptual frameworks that guide the development of applicable practices. The book is, therefore, a useful resource for policy makers, institutions, academics, professionals and students. Second, it provides insights about how student transitions are determined by a range of factors at different levels. These insights extend discussions about student transitions in the current literature which have mainly explored impacts of policies, institutional programmes and human capital. Finally, it is international in focus because it draws on research with different cohorts of students and graduates in different contexts. Insights provided in the book are, therefore, rich, diverse and comparative.

Emerging Critical Scholarship in Education McFarland

Caring Confrontations for Education and Democracy makes a compelling case for redirecting current practices of education to focus on being educated rather than having an education. The book offers a detailed analysis of how an education for democracy must encourage commitment to important ideals and strengthen the vulnerabilities of people which make them easily manipulated by politicians and the media. It addresses the need for education that focusses on people's mode of

being, so that in addition to becoming knowledgeable and skilful, people develop the disposition that is more appropriate for democratic living. Through embodying this approach of authentic spiritual growth through education, this book explores the idea of caring confrontations and critical reflection to enable personal change and growth. Providing a thoughtful analysis of the role of education in democracy, the book will be of great interest to researchers, academics, and students in the fields of philosophy of education, educational theory and democratic education.

[The Oxford Handbook of Feminist Counseling Psychology](#) John Wiley & Sons

The Palgrave Handbook of Gender, Sexuality, and Canadian Politics offers the first and only handbook in the field of Canadian politics that uses 'gender' (which it interprets broadly, as inclusive of sex, sexualities, and other intersecting identities) as its category of analysis. Its premise is that political actors' identities frame how Canadian politics is thought, told, and done; in turn, Canadian politics, as a set of ideas, state institutions and decision-making processes, and civil society mobilizations, does and redoes gender. Following the standard structure of mainstream introductory Canadian politics textbooks, this handbook is divided into four sections (ideologies, institutions, civil society, and public policy) each of which contains several chapters on topics commonly taught in Canadian politics classes. The originality of the handbook lies in its approach: each chapter reviews the basics of a given topic from the perspective of gendered/sexualized and other intersectional identities. Such an approach makes the handbook the only one of its kind in Canadian Politics.

Caring Confrontations for Education and Democracy Oxford University Press

COVID-19 and other public health threats have contributed to more than six million deaths globally in a short amount of time. As such, there is an urgent need to respond to these threats in a way that improves global health and wellbeing. Written by a diverse group of exemplary scientists, the thirteen chapters in this volume provide unique, comprehensive, and science-based approaches to respond to macro-structural, human process, and micro issues affecting public health threats.

Death Doesn't Discriminate Taylor Hathcock

This book, *Victorians and Their Animals: Beast on a Leash*, investigates the notion that British Victorians did see themselves as naturally dominant species over other humans and over animals. They conscientiously, hegemonically were determined to rule those beneath them and the animal within themselves albeit with varying degrees of success and failure. The articles in this collection apply posthuman and other theories, including queer, postcolonialism, deconstruction, and Marxism, in their exploration of Victorian attitudes toward animals. They study the biopolitical relationships between human and nonhuman animals in several key Victorian literary works. Some of this book's chapters deal with animal ethics and moral aesthetics. Also being studied is the representation of animals in several Victorian novels as narrative devices to signify class status and gender dynamics, either to iterate socially acceptable mores or to satirize hypocrisy or breach of behavior or to voice social protest. All of the chapters analyse the interdependence of people and animals during the nineteenth century.

Science-Based Approaches to Respond to COVID and Other Public Health Threats Elsevier Health Sciences

There is a growing interest in corporate whistleblowing, but no comprehensive research has yet focused on public relations practice. Drawing on extensive research on Fortune 1000 and Wilshire

5000 corporations, this book reveals executives' attitudes and relationships toward their organizations and their impact on whistleblowing. Perhaps unsurprisingly, it reveals that wrongdoing in corporations and the privileges of power coexist. Top-ranking public relations executives, who are mostly white and male, are more likely to be aware of wrongdoing but no more likely to blow the whistle, fundamentally due to their positive relationship with their employers. Using the new lens of evolutionary theory, this study explains whistleblowing, retaliation, and relationships, and in the light of the connection between whistleblowing behavior and executives' attitudes, it proposes a new theory of the phenomenon of Golden Handcuffs. As public attitudes to corporations, corporate social responsibility (CSR), and transparency harden, these findings have serious implications for companies globally. Researchers, scholars, and advanced students in public relations, organizational communication, corporate communication, strategic communication, corporate reputation, and CSR will find this book full of revealing insights.

Disability in the Global South Taylor & Francis

Breast Cancer and Gynecological Cancer Rehabilitation, edited by Adrian Cristian, MD, MHCM, provides today's clinicians with a concise, accessible resource covering the holistic rehabilitation of breast cancer patients. Beginning with a review of epidemiology, genetics, and pathophysiology of breast cancer, it then covers clinical assessment and treatment options before providing comprehensive coverage of rehabilitation. Containing practical information, best practices, and the latest advances and research, this book is a valuable reference for physical medicine and rehabilitation physicians and residents, as well as occupational and physical therapists. Provides a clear understanding of the current medical, surgical, and radiation treatments for breast cancer. Covers the whole spectrum of breast cancer rehabilitation, including the role of physical and occupational therapy, treatment of anxiety and depression, pain syndromes, integrative care, nutritional rehabilitation, palliative care, and more. Offers a timely and convenient resource written by leading experts in breast cancer and rehabilitation.

Functional Performance in Older Adults Springer Nature

Browsing for information is a significant part of most research activity, but many online collections hamper browsing with interfaces that are variants on a search box. Research shows that rich-prospect interfaces can offer an intuitive and highly flexible alternative environment for information browsing, assisting hypothesis formation and pattern-finding. This unique book offers a clear discussion of this form of interface design, including a theoretical basis for why it is important, and examples of how it can be done. It will be of interest to those working in the fields of library and information science, human-computer interaction, visual communication design, and the digital humanities as well as those interested in new theories and practices for designing web interfaces for library collections, digitized cultural heritage materials, and other types of digital collections.

[Horror Literature from Gothic to Post-Modern](#) Springer

This handbook summarizes the progress, current status, and future directions relevant to feminist multicultural perspectives in counseling psychology. It emphasizes enduring topics within counseling psychology such as human growth and development, ethics, ecological frameworks, and counseling theory and practice. Intersectionality, social justice, and the diverse social identities of women and girls are featured prominently.
