What is suspense, and why do we feel it? These questions are at the heart of the first part of this study. It develops and defends the 'imminence theory of suspense' - the view that suspense arises in situations that are structurally defined by something essential being imminent. Next, the study utilizes this theory as an interpretative key to Søren Kierkegaard's seminal work 'Frygt og Bæven' ('FB'). FB is an exploration of what it means to take the story of Abraham and Isaac as a paradigmatic example of faith. The study argues that a core aspect of how Kierkegaard conceptualizes faith through the figure of Abraham is suspense. The argument is built upon the observation that to have faith is to

be a hero. To be hero means to belong to a story. Stories manifests different conceptualizations of time. Abraham's story, as FB frames it, is radically geared towards something imminent - it is characterized by an essential relation of suspense. The study then explores how suspense not only forms part of the conceptualization of faith, but is also part of how this conceptualization is communicated. Thus, the study argues that there exists a symmetry of suspense between the rhetorical and the conceptual levels of the text.

Presenting original, detailed studies of keywords of Danish, this book breaks new ground for the study of language and cultural values. Based on evidence from the semantic categories of everyday language, such as the Danish concept of *hygge* (roughly meaning, 'pleasant togetherness'), the book provides an

integrative socio-cognitive framework for studying and understanding language-particular universes. It is argued that the worlds we live in are not linguistically and conceptually neutral, but rather that speakers who live by Danish concepts are likely to pay attention to their world in ways suggested by central Danish keywords and lexical grids. By means of a sophisticated semantic methodology, the author accounts for the meanings of even highly culture-specific and untranslatable linguistic concepts. The book offers new tools for comparative research into the diversity of semantic and cultural systems in contemporary Europe. Additionally, it contributes to the emerging discipline of cultural semantics, and to the ongoing debates of linguistic diversity, metalanguage, and the use of linguistic evidence in studies of culture and social cognition.

"Like a summer superhero movie, this YA fantasy features dazzling adventure and a truly epic romance." -iBooks Official Review All's fair when you're in love with War. For Mia Ahlström, a world ruled by order is the only world she allows. A lifetime of chore charts, to-do lists and study schedules have helped earn her a spot at Redwood State University's engineering program. And while her five year plan includes finding her very own happily-evah-aftah, years at an all-girls boarding school left her feeling woefully unprepared for keg parties and co-ed extracurricular activities. So nothing surprises her more than catching the eye of Tyr Fredriksen at her first college party. The

imposing Swede is arrogantly charming, stubbornly overprotective, and runs hot-and-cold in ways that defy reason . . . until Mia learns that she's fallen for the Norse God of War; an immortal battle deity hiding on Midgard (Earth) to protect a valuable Asgardian treasure from a feral enemy. With a price on his head, Tyr brings more than a little excitement to Mia's rigidly controlled life. Choosing Tyr may be the biggest distraction—or the greatest adventure—she's ever had.

The Germanic Languages Lak Publishing

Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like English, Afrikaans, and the Scandinavian languages. It takes its inspiration from the idea of a "Germanic Sandwich", i.e. the

hypothesis that sets of genetically related languages diverge in systematic ways in diverse domains of the linguistic system. Its contributions set out to test this approach against new phenomena or data from synchronic, diachronic and, for the first time in a Sandwich-related volume, psycholinguistic perspectives. With topics ranging from nickname formation to the IPP (aka 'Ersatzinfinitiv'), from the grammaticalisation of the definite article to /s/-retraction, and from the role of verb-second order in the acquisition of L2 English to the psycholinguistics of gender, the volume appeals to students and specialists in modern and historical linguistics, psycholinguistics, translation studies, language pedagogy and cognitive science, providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The

Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

This book addresses magical ideas and practices in early modern Norway. It examines a large corpus of Norwegian manuscripts from 1650-1850 commonly called Black Books which contained a mixture of recipes on medicine, magic, and art. Ane Ohrvik assesses the Black Books from the vantage point of those who wrote the manuscripts and thus offers an original study of how early modern magical practitioners presented their ideas and saw their practices. The book show how the writers viewed magic and medicine both as practical and sacred art and as knowledge worth protecting through encoding the text. The study of the Black Books illuminates how ordinary people in Norway conceptualized magic as valuable and useful knowledge worth of collecting and saving despite the ongoing witchcraft prosecutions targeting the very same ideas and practices as the books promoted. Medicine, Magic and Art in Early Modern Norway is essential for those looking to advance their studies in magical beliefs and practices in early modern Europe as well as those interested in witchcraft studies, book history, and the history of knowledge.
