This rich oral history weaves a tapestry of memories and experience from interviews, roundtable discussions, personal memoirs, and thorough research. In the sixtieth anniversary year of the Catholic Worker, Rosalie Riegler Troester reconfirms the diversity and commitment of a movement that applies basic Christianity to social problems. Founded in 1933 by Dorothy Day and Peter Maurin, the Catholic Worker has continued to apply the principles of voluntary poverty and nonviolence to changing social and political realities. Over 200 interviews with Workers from all over the United States reveal how people came to this movement, how they were changed by it, and how they faced contradictions between the Catholic Worker philosophy and the call of contemporary life. Vivid memoirs of Dorothy Day, Peter Maurin, and Ammon Hennacy are

interwoven with accounts of involvement with labor unions, war resistance, and life on Catholic Worker farms. The author also addresses the Worker's relationship with the Catholic Church and with the movement's wrenching debates over abortion, homosexuality, and the role of women. Author note: Rosalie Riegler Troester is Professor of English at Saginaw Valley State University in Michigan.

Report Macmillan

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related

disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

This comprehensive history fills an important gap in the story of the Civil War. Too often the war waged west of the Mississippi River has been given short shrift by historians and scholars, who have tended to focus their attention on the great battles east of the river. This book looks in detail at the military operations that occurred in Louisiana—most of them minor skirmishes, but some of them battles and campaigns of major importance. The Civil War in Louisiana begins with the first talk of secession in the state and ends with the last tragic days of the war. John D. Winters describes with great fervor and detail such events as the fall of Confederate New Orleans and the burning of Alexandria. In addition to military action, Winters discusses the political, economic, and social aspects of the war in Louisiana. His accounts of battles and the men who waged them provide a fuller story of Louisiana in the Civil War than has ever before been told.

well as revised materials dealing with education policy and updating of references and case law throughout.
