The rhinoceros's horn and massive leathery frame belie its docile and solitary nature, causing the animal to be consistently perceived by humans as a monster to be feared. Kelly Enright now deftly sifts fact from fiction in *Rhinoceros*. Enright chronicles the vexed interactions between humans and rhinos, from early sightings that mistook the rhinoceros for the mythical unicorn to the eighteenth-century display of the rhinoceros in Europe as a wonder of nature and its introduction to the American public in 1830. The rhinoceros has long been a prized hunting object as well, whether for its horn as a valuable ingredient in Asian medicine or as a coveted trophy by nineteenth-century big-game hunters such as Theodore Roosevelt, and the book explains how such practices have led to the rhino's status as an endangered species. Enright also considers portrayals of the animal in film, literature, and art, all in the service of discovering whether the reputed savagery of the rhino is a reality or a legacy of its mythic past. A wide-ranging, highly illustrated study, *Rhinoceros* will be essential for scholars and animal lovers alike.

Written for everyone fascinated by the huge beasts that once roamed the earth, this book introduces the giant hornless rhinoceros, *Indricotherium*. These massive animals inhabited Asia and Eurasia for more than 14 million years, about 37 to 23 million years ago. They had skulls 6 feet long, stood 22 feet high at the shoulder, and were twice as heavy as the largest elephant ever recorded, tipping the scales at 44,100 pounds. Fortunately, the big brutes were vegetarians. Donald R. Prothero tells their story, from their discovery just a century ago to the latest research on how they lived and died.

From the birth of Islam in the seventh century to the voyages of European exploration in the fifteenth, Africa was at the center of a vibrant exchange of goods and ideas. It was an African golden age in which places like Ghana, Nubia, and Zimbabwe became the crossroads of civilizations, and where African royals, thinkers, and artists played celebrated roles in the globalized world of the Middle Ages. Drawing on fragmented written sources as well as his many years of experience as an archaeologist, the author reconstructs an African past that is too often denied its place in history. He looks at ruined cities found in the mangrove, exquisite pieces of art, rare artifacts like the golden rhinoceros of Mapungubwe, ancient maps, and accounts left by geographers and travelers

Throughout his work, the philosopher Theodor W. Adorno repeatedly invokes the rhinoceros. Taking its cue from one of these passages in *Aesthetic Theory*, 'So a rhinoceros, the mute animal, seems to say: I am a rhinoceros', this book explores the life of this animal in Adorno's texts, and articulates the nuanced interconnections between art, nature and critique in his thought. By thus illuminating key elements of Adorno's work, this volume reveals the invaluable contributions that this 'classical' thinker can make to our current reflections on the various pressing natural and political crises of our times.

Who Wants a Cheap Rhinoceros? CRC Press

"The acclaimed author of Lempriere's Dictionary furnishes another richly textured romp steeped in history, legend, and excitement" (Booklist). The Pope's Rhinoceros is a vivid, antic, and picaresque novel spun around one of history's most bizarre chapters: the sixteenth-century attempt to procure a rhinoceros as a bribe for Pope Leo X. In February 1516, a Portuguese ship sank off the coast of Italy. The Nostra Senora de Ajuda had sailed fourteen thousand miles from the Indian kingdom of Gujarat. Her mission: to bribe the "pleasure-loving Pope" into favoring expansionist Portugal over her rival Spain with the most exotic and least likely of gifts — a living rhinoceros. Moving from the herring colonies of the Baltic Sea to the West African rain forest, with a cast of characters including an order of reclusive monks and Rome's corrupt cardinals, courtesans, ambassadors, and nobles, The Pope's Rhinoceros is at once a fantastic adventure tale and a portrait of an age rushing headlong to its crisis. "An exhausting banquet of a book . . . One of the most original, energetic, and ambitious novels of recent years." —Kirkus Reviews "Mr. Norfolk's heady originality and intellectual energy are apparent on every page." —The New York Times Book Review

Kevin Ducey's Rhinoceros was selected from over 1,000 manuscripts by Yusef Komunyakaa for the APR/Honickman First Book Prize. With lyrical turns and metaphorical sways, Rhinoceros embodies mythologies that are brought down to earth and riffs on history, desire, death, sex and food. We have lunch with Hawking and Disney before stopping in to see how Robert Browning's recording session with Thomas Edison is getting on. (They hate each other.) Komunyakaa writes in his introduction: "Rhinoceros has a playfulness that pulses alongside a seriousness, and this rippling effect resonates beneath the skin. . . . A keen imagination drives these impressive poems." Kevin Ducey teaches creative writing at the University of Notre Dame and lives in South Bend, Indiana.

The sublime is confused with the ridiculous in this savage commentary on the human condition, a staple of every theatre classroom and 20th century drama. A small town is besieged by one roaring citizen who becomes a rhinoceros and proceeds to trample on the social order. As more citizens are transformed into rhinoceroses, the trampling becomes overwhelming, and more and more citizens become rhinoceroses. One sane man, Berenger, remains, unable to change his form and identity.
