You can have fun alone or together with your child, learning the basics of music theory while listening to your favourite songs. Practical exercises and videos will help you to develop the necessary skills to use the keyboard and guitars to express yourself. I will explain to you: - How to feel the heartbeat of the song - What is a metronome and why it is so vital to use it - Basic note and rest lengths - What is the time signature and how to count music - How to read music and what is the pitch of the sound - How to remember note locations - How to develop your fine motor skills and coordination . In the first theory book, I explain the rhythm and the pitch - the two main things if you want to understand, read, and play music. This book is universal and can be used by any student that wants to play any musical instrument. Violin, guitar, piano, singing - all of these and other instruments use the same notation and the same basic rules. After this book, you will be able to feel the rhythm of nearly any song that you hear. You will be able to read notes in treble clef and even more - you will be ready to start playing nearly any musical instrument. Reading sheet music is important, but practical skills are vital for any musician as well. At the end of the book, you will find the list of recommended songs to listen to. Remember - it is impossible to play music if you don't listen to it. That's why listening exercises are vital. If you are a beginner or always wanted to start understanding the music, but didn't know where to start - your moment is here!

[Essentials of Music Theory: Rhythm Double Bingo](#) John Wiley & Sons

From Grammy-winning musical icon and legendary bassist Victor L. Wooten comes an inspiring parable of music, life, and the difference between playing all the right notes...and feeling them. The Music Lesson is the story of a struggling young musician who wanted music to be his life, and who wanted his life to be great. Then, from nowhere it seemed, a teacher arrived. Part musical genius, part philosopher, part eccentric wise man, the teacher would guide the young musician on a spiritual journey, and teach him that the gifts we get from music mirror those from life, and every movement, phrase, and chord has its own meaning...All you have to do is find the song inside. "The best book on music (and its connection to the mystic laws of life) that I've ever read. I learned so much on every level."—Multiple Grammy Award-winning saxophonist Michael Brecker
