Histoire et Description de Notre-Dame de Melun Penguin
During the first millennium BCE, complex encounters of Phoenician and Greek colonists with natives of the Iberian Peninsula transformed the region and influenced the entire history of the Mediterranean. One of the first books on these encounters to appear in English, this volume brings together a multinational group of contributors to explore ancient Iberia's colonies and indigenous societies, as well as the comparative study of colonialism. These scholars—from a range of disciplines including classics, history, anthropology, and archaeology—address such topics as trade and consumption, changing urban landscapes, cultural transformations, and the ways in which these issues played out in the Greek and Phoenician imaginations. Situating ancient Iberia within Mediterranean colonial history and establishing a theoretical framework for approaching encounters between colonists and natives, these studies exemplify the new intellectual vistas opened by the engagement of colonial studies with Iberian history.

Il y a d'abord une histoire rocambolesque autour de cette statuette, et c'est cette histoire qui lui a donné son nom, la "Dame D'Auxerre", un nom qui est une caricature de nom et qui cache son absence de nom. Tout en elle est mystère. Son origine, son histoire, le sens de son geste. Traditionnellement, ce mystère a été traité archéologiquement, comparativement, par l'érudition. Le paradoxe de cette érudition, c'est qu'elle est à la fois précieuse, indispensable, mais purement documentaire. Elle ne dit rien de ce que nous fait, de ce que continue de nous faire cette statuette. Et c'est son mystère, avec tout ce qu'il a d'affectif, qui constitue l'objet de cet essai.

The touchstones of Gothic monumental art in France - the abbey church of Saint-Denis and the cathedrals of Chartres, Reims, and Bourges - form the core of this collection dedicated to the memory of Anne Prache. The essays reflect the impact of Prache's career, both as a scholar of wide-ranging interests and as a builder of bridges between the French and American academic communities. Thus the authors include scholars in France and the United States, both academics and museum professionals, while the thematic matrix of the book, divided into architecture, stained glass, and sculpture, reflects the multiple media explored by Prache during her long career. The essays employ a varied range of methodologies to explore Gothic monuments. The chapters in the architectural section include an intensive archeological analysis of the foundations of Reims Cathedral, the close reading

of a late medieval literary text for a symbolic understanding of Paris, and essays that explore the medieval use of practical geometry in designing entire buildings and their components. Saint-Denis, Reims, and Chartres, all monuments studied by Prache, are discussed in the next part, on stained glass. These chapters demonstrate how old problems can be clarified by new evidence, whether from the accessibility of previously unknown archival information, for Reims, or through revelations that arise from restoration, at Chartres. These essays also include a study showing the complexity of making attributions for the storied glass of Saint-Denis. The final set of essays likewise takes different approaches to sculpture, whether constructing links to the liturgy at Reims, or discussing the meaning of a sculptural ensemble studied by Prache early in her career, the cloister of Notre-Dame-en-Vaux in Châlons-en-Champagne, or scrupulously examining the façade sculpture at Bourges Cathedral for insights into the design process. As a whole, the volume provides a window onto key directions in the study of [Host Bibliographic Record for Boundwith Item Barcode 30112002644547 and Others](#) University of Ottawa Press

A Social History of the Cloister Routledge

With 1,125 entries and 170 contributors, this is the first encyclopedia on the history of classical archaeology. It focuses on Greek and Roman material, but also covers the prehistoric and semi-historical cultures of the Bronze Age Aegean, the Etruscans, and manifestations of Greek and Roman culture in Europe and Asia Minor. The Encyclopedia of the History of Classical Archaeology includes entries on individuals whose activities influenced the knowledge of sites and monuments in their own time; articles on famous monuments and sites as seen, changed, and interpreted through time; and entries on major works of art excavated from the Renaissance to the present day as well as works known in the Middle Ages. As the definitive source on a comparatively new discipline - the history of archaeology - these finely illustrated volumes will be useful to students and scholars in archaeology, the classics, history, topography, and art and architectural history.

Henri Meschonnic was a linguist, poet, translator of the Bible and one of the most original French thinkers of his generation. He strove throughout his career to reform the understanding of language and all that depends on it. His work has had a shaping influence on a generation of scholars and here, for the first time, a selection of these are made available in English for a new generation of linguists and philosophers of language. This Reader, featuring fourteen texts covering the core concepts and topics of Meschonnic's theory, will enrich, enhance and challenge your understanding of language. It explores his key ideas on poetics, the poem, rhythm, discourse and his critique of the sign. Meschonnic's vast oeuvre was continuously preoccupied with the question of a poetics of society; he constantly connected the theory of language to its practice in various fields and interrogated what that means for society. In exploring this fundamental question, this book is central to the study and philosophy of language, with rich repercussions in fields such as translation studies, poetics and literary studies, and in redefining notions such as rhythm, modernity, the poem and the subject. *Actes Du 22e Congrès International Des Sciences Généalogique Et Héraldique À Ottawa 18-23 Août 1996* Cornell University Press
First published in 2012, this catalogue presents fifty-six Etruscan, Greek, and Italic carved ambers from the Getty Museum's collection—the second largest body of this material in the United States and one of the most important in the world. The ambers date from about 650 to 300 BC. The catalogue offers full description of the pieces, including typology, style, chronology, condition, and iconography. Each piece is illustrated. The

catalogue is preceded by a general introduction to ancient amber (which was also published in 2012 as a stand-alone print volume titled *Amber and the Ancient World*). Through exquisite visual examples and vivid classical texts, this book examines the myths and legends woven around amber—its employment in magic and medicine, its transport and carving, and its incorporation into jewelry, amulets, and other objects of prestige. This publication highlights a group of remarkable amber carvings at the J. Paul Getty Museum.

Le nom de notre ignorance, la Dame d'Auxerre JHU Press

At the beginning of the twelfth century, the region around Paris had a reputation for being the land of unruly aristocrats. Entrenched within their castles, the nobles were viewed as quarrelling among themselves, terrorizing the countryside, harassing churchmen and peasants, pillaging, and committing unspeakable atrocities. By the end of the century, during the reign of Philip Augustus, the situation was dramatically different. The king had created the principal governmental organs of the Capetian monarchy and replaced the feudal magnates at the royal court with loyal men of lesser rank. The major castles had been subdued and peace reigned throughout the countryside. The aristocratic families remain the same, but no longer brigands, they had now been recruited for royal service. In his final book, the distinguished historian John Baldwin turned to church charters, royal inventories of fiefs and vassals, aristocratic seals and documents, vernacular texts, and archaeological evidence to create a detailed picture of the transformation of aristocratic life in the areas around Paris during the four decades of Philip Augustus's reign. Working outward from the reconstructed biographies of seventy-five individuals from thirty-three noble families, Baldwin offers a rich description of their domestic lives, their horses and war gear, their tournaments and crusades, their romantic fantasies, and their penances and apprehensions about final judgment. Knights, Lords, and Ladies argues that the aristocrats who inhabited the region of Paris over the turn of the twelfth century were important not only because they contributed to Philip Augustus's increase of royal power and to the wealth of churches and monasteries, but also for their own establishment as an elite and powerful social class.

Notre-Dame de Paris BRILL

Victor Hugo est un écrivain romantique français mondialement célèbre. L'influence de son oeuvre, créée au XIXe siècle, sur l'évolution de la littérature est indéniable. Maintes fois adaptée au cinéma, son roman «Notre-Dame de Paris» est une de ses oeuvres les plus connues et encensees. Le lecteur suit les méandres d'un amour tragique de trois hommes pour une femme. Cependant c'est Notre-Dame qui est le personnage principal, cette cathédrale qui recèle une multitude de secrets, qui réunit des personnes les plus opposées et décide de leur sort.

Although Sainte-Palaye had a surprising influence on the literature and historiography of both the eighteenth and nineteenth centuries—in France, England, and Germany—eighteenth-century medievalism, Gossman argues, is best understood not as anticipation of things to come but as part of a complex of ideas and feelings peculiar to the Enlightenment itself.
