"A documentary is being filmed. A cell phone rings, playing the "Rocky" theme song. The filmmaker is told she must pay \$10,000 to clear the rights to the song. Can this be true? "Eyes on the Prize," the great civil rights documentary, was pulled from circulation because the filmmakers' rights to music and footage had expired. What's going on here? It's the collision of documentary filmmaking and intellectual property law, and it's the inspiration for this new comic book. Follow its heroine Akiko as she films her documentary, and navigates the twists and turns of intellectual property. Why do we have copyrights? What is "fair use"? Bound By Law reaches beyond documentary film to provide a commentary on the most pressing issues facing law, art, property and an increasingly digital world of remixed culture"--

Inspiration to Live Your Magic! Penguin UK

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Study and Master Accounting Grade 12 CAPS Teacher's Guide Theatre Communications Group

Lesson plans and activities to teach science to elementary level students.

Science, Grade 4 McGraw-Hill/Glencoe

Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

Ovarian Cycle Academic Press

Based on classical principles, this book is intended for a second course in Euclidean geometry and can be used as a refresher. Each chapter covers a different aspect of Euclidean geometry, lists relevant theorems and corollaries, and states and proves many propositions. Includes more than 200 problems, hints, and solutions. 1968 edition.

Physical Sciences, Grade 12 Scott Foresman

Building Skills: Math provides additional mathematics skills practice related to the science content in each chapter. It includes five basic categories of math skill review: Number Sense; Algebra and Functions; Measurement and Geometry; Statistics, Data Analysis and Probability; and Mathematical Reasoning.

Asem Pratham Books

My Destiny is a autobiography of Mjaju Mathe a young South African born in Carletonville. This book is about his life and journey of chasing his dream and doing whatever he has to do to make his dream a reality

Study and Master Technology Grade 7 for CAPS Teacher's Guide Greystone Books

Deals with the realities of drug use including: what causes people to use drugs, how these drugs work - physiologically and emotionally, what illicit drugs are most commonly used in Australia, the pros and cons of different treatments available, what happens in counselling, a list of services available in each state.

Study and Master Life Sciences Grade 11 CAPS Study Guide Carson-Dellosa Publishing

Statistics for the Life Sciences, Fourth Edition, covers the key concepts of statistics as applied to the life sciences, while incorporating the tools and themes of modern data analysis. This text uses an abundance of real data in the exercises and examples, and minimizes computation, so that readers can focus on the statistical concepts and issues, not the mathematics. Basic algebra is assumed as a prerequisite.

Vlok's Community Health Revised 6e WITH CD Springer Nature

`It's a really great book: friendly, comprehensive, complete and up-to-date. It is an explanatory guide to help you judge and choose the contraception to use. I recommend the book highly.' Dr Cindy Pan, general practitioner, media broadcaster and author of Pandora's Box. Choosing a method of contraception isn't simply about preventing pregnancy. It's also about making the best choice for your future, your lifestyle, your health and your peace of mind. This updated edition of Contraception-Healthy Choices provides both women and men with information to help make that choice. Forms of contraception covered include condoms (male and female), progestogen-only injections, implants, diaphragms, cervical caps, intrauterine devices (IUDs), natural family planning, traditional methods and sterilisation. The book also includes an update on the contraceptive pill, a new chapter on the increasingly popular vaginal ring, and new information on emergency contraception. There is information on how pregnancy happens, reducing the incidence of sexually transmissible infections and abortion. Written in an easy-to-read Q&A format and illustrated throughout, Contraception-Healthy Choices is a practical and contemporary guide for people who

want to make a contraception they use.

Statistics for the Life Sciences Penguin Random House South Africa

Inquiry-based general science curriculum for the third grade featuring a text/workbook that students can write in.

Study and Master Geography Grade 10 CAPS Study Guide CSPD

Many contemporary concerns in higher education focus on the student experience of learning. With a larger and much more diverse intake than ever before, linked with a declining unit of resource, questions are being asked afresh around the purposes of higher education. Although much of the debate is currently focused on issues of student access and success, a simple input-output model of higher education is insufficient. This book turns this conversation on its head, by inserting a full consideration of student agency into the context of higher education. Working sociologically, it explores the influence of the social context on what the individual student achieves. The theoretical tenets of a social realist approach are laid out in detail in the book; the potential value of this approach is then illustrated by a case study of student learning in engineering education. Employing Margaret Archer's social realist theory, an analysis of student narratives is used to work towards a realist understanding of the underlying mechanisms that constrain and enable student success. Building on this analysis, the book develops a novel set of proposals for potential ways forward in improving student learning in higher education.

Romeo and Juliet, Grade 12 UNESCO Publishing

The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

My Destiny Springer Science & Business Media

This contributed volume explores how plant growth-promoting rhizobacteria (PGPR) provide a wide range of benefits to the plant. Further, it discusses the key roles PGPR play in nutrient acquisition and assimilation, improved soil texture, secreting, and modulating extracellular molecules. The book outlines how plant secondary metabolites are natural sources of biologically active compounds used in a wide range of applications, and surveys the significant role of volatile organic compounds (VOCs) in plant communication by mediating above- and below-ground interactions between plants and the surrounding organisms. This volume compiles research from leading scientists from across the globe, linking the translation of basic knowledge to innovative applied research. The book focuses on the following three categories: 1) understanding the secondary metabolites produced by PGPR, the signaling mechanisms and how they affect plant growth, 2) the plausible role of volatile organic compounds produced by PGPR, their role and the signaling mechanism for plant growth promotion, and 3) Applications of VOCs and secondary metabolites of PGPR for seed germination, plant growth promotion; stress tolerance and in-plant health and immunity.

Science, Grade 6 Choice Books

A treasure trove of Dahl! Amazing facts - some funny, some silly - and an original chapter from Charlie and the Chocolate Factory make this a splendiferous, surprising and delicious treat from the wonderful world of Roald Dahl!

Interactive Science Routledge

This volume presents an in-depth review of experimental and theoretical studies on the newly discovered Fe-based superconductors. Following the Introduction, which places iron-based superconductors in the context of other unconventional superconductors, the book is divided into three sections covering sample growth, experimental characterization, and theoretical understanding. To understand the complex structure-property relationships of these materials, results from a wide range of experimental techniques and theoretical approaches are described that probe the electronic and magnetic properties and offer insight into either itinerant or localized electronic states. The extensive reference lists provide a bridge to further reading. Iron-Based Superconductivity is essential reading for advanced undergraduate and graduate students as well as researchers active in the fields of condensed matter physics and materials science in general, particularly those with an interest in correlated metals, frustrated spin systems, superconductivity, and competing orders.

Science Evan-Moor Corporation

Inspiration to Live Your MAGIC (TM) contains 75 biographical introductions that capture the essence of each person's life in about 400 words. Young people can find a role model and do more research and reading. Everyone, with five minutes to read, can find inspiration and perspective. Aspiring public speakers can find ready-made life stories to illustrate their speeches. Every person in this collection is an inspiration to others, through their response to challenges (and some of them faced incredible challenges), by their commitment to serving humanity and their fidelity to their values. A book of inspiration for everyone. Praise for Inspiration to Live Your MAGIC (TM) This book is filled with real life stories of courage, leadership, wisdom and love. A must read for all young people. Our world is a better place because of the choices each of these people made in their life journey. Jay Ball, President & CEO Junior Achievement of Northern Alberta Larry Anderson's own story is compelling and inspiring enough, never mind the stories contained in Inspiration to Live Your MAGIC (TM). From young people with a belief that child labour is wrong, to world class philosophers, Larry Anderson captures the spirit and essence of inspiration. In this volume you will find stories of children, women and men who followed their dreams. These inspired individuals changed their communities, their nation and the world. From politics, diplomacy, entertainment, the arts and science, their stories demonstrate the triumph of the human spirit. From the slums of Calcutta, to the halls of Government, the Courts and the glitz of Las Vegas, these individual stories are victories of faith over fear. A must read for all, this book is truly inspiring. Robert Philp Provincial Court Judge Edmonton, Alberta, Canada These seventy-five biographies showcase people from all age groups, backgrounds and cultures. What they share is a passion and commitment to make their dreams come true and to make a difference for others in the process. Read Inspiration to Live Your MAGIC (TM), you will be inspired. Bill Trainor, Retired Teacher I love the way "Inspiration to Live Your MAGIC (TM) is written. It captures your attention and is easy to read and understand. I not only learned but it evoked a yearning inside me to live my own magic. Thank you. Jeannie Lungard, Teacher, Psychologist

Spectrum Science is sure to captivate students' interest with a variety of fascinating science information! The lessons, perfect for students in grade 4, strengthen science skills by focusing on data collection, life cycles, metals and alloys, space techn

Facing Drugs National Academies Press

Traditionally, the natural sciences have been divided into two branches: the biological sciences and the physical sciences. Today, an increasing number of scientists are addressing problems lying at the intersection of the two. These problems are most often biological in nature, but examining them through the lens of the physical sciences can yield exciting results and opportunities. For example, one area producing effective cross-discipline research opportunities centers on the dynamics of systems. Equilibrium, multistability, and stochastic behavior—concepts familiar to physicists and chemists—are now being used to tackle issues associated with living systems such as adaptation, feedback, and emergent behavior. Research at the Intersection of the Physical and Life Sciences discusses how some of the most important scientific and societal challenges can be addressed, at least in part, by collaborative research that lies at the intersection of traditional disciplines, including biology, chemistry, and physics. This book describes how some of the mysteries of the biological

world are being addressed using tools and techniques developed in the physical sciences, and identifies five areas of potentially transformative research. Work in these areas would have significant impact in both research and society at large by expanding our understanding of the physical world and by revealing new opportunities for advancing public health, technology, and stewardship of the environment. This book recommends several ways to accelerate such cross-discipline research. Many of these recommendations are directed toward those administering the faculties and resources of our great research institutions—and the stewards of our research funders, making this book an excellent resource for academic and research institutions, scientists, universities, and federal and private funding agencies.
