Scholars Dental Education specializes in online courses that prepare dentists from all over the world for the Canadian dental board exams, helping them become licensed in Canada. Scholars Dental has been providing NDEB AFK prep courses for many years with successful results and excellent reviews. Their innovative online platform includes live seminars, experienced instructors, recorded lectures, online quizzes, online mock exams, and a new way of learning and understanding dentistry all together. This course has a unique Basic Science section which is a must for all dentists taking a dental board exam such as NDEB and INBDE exams. The Scholars Dental team believes that all dentists should have the opportunity to learn basic sciences in a way specifically designed for dental students. Basic sciences, if taught properly, builds the foundation that would simplify complicated subjects such as pharmacology and pathology, which are usually major obstacles in passing dental board exams. Dr. Ahmad Hafez successfully passed the NDEB AFK exam with a score of 91 on his first attempt and passed the ACJ & ACS NDEB exams of that same year on his first attempt. Dr. Hafez was also accepted to the IDAPP program at the University of Toronto. He went on passing the written board exams and OSCE exams and received his license in early 2014. He is a member of the Royal College of Dental Surgeons of Ontario, American Academy of Implant Dentistry and has received his Fellowship Certificate from the Oral Surgery Academy for General Dentists. Dr. Hafez started teaching AFK lectures in 2013 with amazing feedback from students. Dr. Hafez's main strength is his ability to break down complicated concepts and then teach it in a simple way. His understanding of the obstacles a foreign trained dentist must overcome to pass the AFK exam is a great benefit to all of his students. Dr. Hafez has been working as a licensed dentist in Canada since January 2014, with experience in private practice and community health centers. Dr. Hafez continues to be a student of dentistry, and has taken multiple continuing education courses in fields of sedation, oral surgery, occlusion, periodontics, cosmetic dentistry and implantology.

NBDHE Secrets Study Guide StatPearls Publishing, LLC

This book provides essential knowledge for creating treatment plans for adult dental patients. Treatment planning strategies are presented to help with balancing the ideal with the practical, with emphasis placed on the central role of the patient — whose needs should drive the treatment planning process. The focus is on planning of treatment, not on the comprehensive details of every treatment modality in dentistry. CD-ROM bound into book presents five cases of varying difficulty with interactive exercises that allow users to plan treatment. What's the Evidence? boxes link clinical decision-making and treatment planning strategies to current research. In Clinical Practice boxes highlight specific clinical situations faced by the general dentist. Review Questions and Suggested Projects, located at the end of each chapter, summarize and reinforce important concepts presented in the book. Key Terms and Glossary highlights the terms that are most important to the reader. Suggested Readings lists included at the end of most chapters provide supplemental resources. Chapter on Treatment Planning for Smokers and Patients with Oral Cancer addresses the dentist's role in managing patients with oral cancer, recognizing oral cancer and differential diagnosis of oral lesions, planning treatment for patients undergoing cancer therapy, and smoking cessation strategies. Chapter on Treatment Planning for the Special Care/Special Needs Patient examines the role of the general dentist in the management of patients with a variety of conditions including physical handicaps, mental handicaps, head trauma, hemophilia, and patients' needs before, during, or after major surgery. Chapter on Treatment Planning for the Alcohol and Substance Abuser discusses the challenges of treating this patient population, as well as how to recognize the problem, delivery of care, scope of treatment, and behavioral/compliance issues. Expanded content on Ethical and Legal Issues in Treatment Planning reflects new accreditation guidelines. Dental Team Focus boxes highlight the relevance of chapter content to the dental team. Ethics Topics boxes emphasize the ethical topics found within each chapter. International Tooth Numbering is listed alongside the U.S. tooth numbers in examples and illustrations.
