According to Larry Teal, the best method of learning to play the saxophone is to study with a competent teacher. Teal's studies were mostly of instruments other than the saxophone, but as a student at a Chautauqua summer session, he came under the influence of Georges Barrère, the eminent French flutist. He played bass clarinet with the Detroit Symphony, but he continued to be absorbed by the saxophone. As a result of his acquired expertise and growing reputation, he was appointed to a full-time faculty position as a saxophone teacher by the University of Michigan -- the first ever to receive such an appointment from a major university. During his 21-year tenure, he attracted students from all over, thus exerting an ever widening influence on saxophone teaching and performing.

*The First Bach Book* Alfred Music

**Brandenburg Concertos, Volume I** Boston Music Company

This Open Access book outlines ideas for a novel, scalable and, above all, sustainable financial system. We all know that today's global markets are unsustainable and global governance is not effective enough. Given this situation, could one boost smart human coordination, sustainability and resilience by tweaking society at its core: the monetary system? A Computational Social Science team at ETH Zürich has indeed worked on a concept and little demonstrator for a new financial system, called "Finance 4.0" or just "FIN4", which combines blockchain technology with the Internet of Things ("IoT"). What if communities could reward sustainable actions by issuing their own money ("tokens")? Would people behave differently, when various externalities became visible and were actionable

through cryptographic tokens? Could a novel, participatory, multi-dimensional financial system be created? Could it be run by the people for the people and lead to more societal resilience than today's financial system (which is effectively one-dimensional due to its almost frictionless exchange)? How could one manage such a system in an ethical and democratic way? This book presents some early attempts in a nascent field, but provides a fresh view on what cryptoeconomic systems could do for us, for a circular economy, and for scalable, sustainable action.

*The Ultimate Bass Songbook* Alfred Music  
"Rock guitar playing made easy! This book is an introduction to rock guitar playing for absolute beginners. It is very easy, teaching without music reading, and starting from scratch. Everything is explained with chord charts and tablature, and recorded on the included CD. In Part 1 you will learn easy basic rhythms played with a rock guitar sound. Things really get going in Part 2. You will discover the secrets of rock songs by Jimi Hendrix, Metallica, Van Halen and AC/DC. And there are riffs, solo techniques and the popular touch (tapping) mode of playing. In Part 3 you will see how your guitar can be changed into a speeding rocket. There are finger exercises for the right and left hands and much, much more."
